

Nigerian Environmental
Study Action Team

NEST JOURNAL OF SCIENCE, ENVIRONMENT, AND

ABOUT THE JOURNAL

NEST Journal of Science, Environment, and Development

The NEST Journal of Science, Environment, and Development is a scholarly publication of the Nigerian Environmental Study Action Team (NEST), dedicated to advancing research, knowledge, and informed practice in science, environmental sustainability, and sustainable development.

The Journal provides a platform for researchers, academics, practitioners, policymakers, and development professionals to disseminate original research, reviews, case studies, and innovative perspectives addressing contemporary environmental and development challenges. Its scope encompasses environmental science and management, climate change, biodiversity conservation, natural resources, sustainable agriculture, environmental policy and governance, ecosystem-based approaches, and related areas of sustainable development.

The Journal seeks to promote evidence-based knowledge and interdisciplinary dialogue that contribute to practical solutions for Nigeria's environmental and development challenges, while connecting scientific research with policy, practice, and societal action.

Target Audience: Researchers, academics, environmental practitioners, policymakers, development professionals, students, civil society organizations, and other stakeholders working in science, environment, and sustainable development.
